Description

Features

Introductions:

A battery holder is one or more compartments or chambers for holding a battery. For dry cells, the holder must also make electrical contact with the battery terminals. For wet cells, cables are often connected to the battery terminals, as is found in automobiles or emergency lighting equipment. Where the battery is expected to last over the life of the product, no holder is necessary, and a tab welded to the battery terminals can be directly soldered to a printed circuit board. A good choice for you!

Features:

- High Quality Plastic Holder.
- Small size, easy to carry.
- 18650 Battery Holder Case Leads 3.7V
- Takes 1 standard size 18650 batteries side by side to form a compact battery of 3.7V using alkaline batteries.

Specifications:

- Color: Black
- Weight: 105g
- Battery Type: 1 pcs 18650
- Dimensions: 7.50 x 6.00 x 1.50cm (L x W x H)
